## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Shuler (6,142,172). Noting particularly to figures 4-9. The insert is readable on elements 86-86D and 92 (see figures 4-9). The first fluid passageway is readable on the splined teeth 72 and splined grooves 80 and the second fluid passageway is readable on the interior passage within elements 86-86D and 94. The claimed center bore is readable on the opening within element 88 above element 96. or the opening above element 52. Also, element 66 defines the final passage that leads into the final passage 66. The remaining claimed elements are comparable to the elements in Shuler et al and are not necessary to expound upon.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
